Instructions for Automated Deployment of SAP GUI 7.5 Patch 12 for Windows

SAP GUI Installation Script Download	Download the script from the following location: https://uoft.me/sap-gui-patch-script
Installation Package Target Version	SAP GUI 7.50 Patch 12
Running SAP GUI (at the time of installation via the script)	If SAP GUI is running, a 90 seconds interval will be given to the user to voluntarily close the application before it is forcibly closed.
Running SAP GUI 7.50 Patch 12 Installer	SAP GUI 7.5 installer runs. The script will not continue if it encounters fatal exit codes from the installer. Note: non-zero exit codes from the 7.5 installer are incremented by 69000 in order to avoid collision with SCCM FailureRetry codes. For example, exit code 70 ("invalid xml") becomes 69070.

	 SAP GUI for Windows 7.50 Compilation 2 Patch 12 **PowerShell App Deployment Toolkit** Installing SAP GUI for Windows 7.50 Patch 12...
Restart Windows OS	If a user is logged on, 300 second count down will be given before the machine is **force** rebooted
SAP GUI Version	The version can be checked as below
